Profitable growth of underlying portfolio mitigates adverse market movements

Net direct portfolio performance overview

		Partners Group ¹	
		Q1 2022 YTD	Last 10 years as of 31 March 2022
	Private equity	1.6%	19.8%
	Private debt	0.2%	6.5%
	Private infrastructure	3.6%	13.9%
	Private real estate	1.0%	9.3%

¹ Partners Group shows performance as model net returns, which are based on gross investment performance and standard fee parameters for the three-month period ended on 31 March 2022 and for the 10-year period ended on 31 March 2022, respectively. All cash flows and valuations are converted to USD using fixed FX rates as of 31 March 2022. Return figures denote annualized pooled internal rates of returns (IRR) of direct investments in private equity, private debt and private infrastructure. Private real estate includes all investments underlying Partners Group's Real Estate Opportunity (REO) strategies, representing private real estate direct investments and (direct) secondary investments. Model net figures do not include the impact of factors such as any taxes incurred by investors, organizational and administration expenses or ongoing operating expenses incurred by the investment program (e.g. audit, hedging etc.). The performance presented reflects model performance an investor may have obtained had they invested in the manner and the time period shown and does not represent performance that any investor actually attained. Market volatility has led to the postponement of exit activities originally planned for H1

Partners Group's underlying portfolio realizations (in USD billion)

- 2021 included a catching up in exit activities from 2020
- In late 2021 several sizeable exits were accelerated from 2022
- In H1 2022 portfolio assets and credit distributions accounted for 72%¹

Our focus remains on business building and value creation with several exits postponed until markets are more benign

Postponed realizations are expected to bring H1 performance fees to 5-10% of total H1 revenues; mid- to long-term guidance of 20-30% confirmed

¹ Direct equity realizations accounted for the remaining 28% of H1 2022 portfolio realizations. For illustrative purposes only. Past performance is not indicative of future results. There is no assurance that similar investments will be made. Source: Partners Group (2022).

Sustained AuM growth impacted by FX

Total assets under management development (in USD billion)

Due to rounding, some totals may not correspond with the sum of the separate figures. ¹ Tail-downs & redemptions: tail-downs consist of maturing investment programs (typically closed-ended structures); redemptions stem from evergreen programs. ² Other consists of performance and investment program changes from select programs. ³ Partners Group reports fee-paying AuM. Most of the firm's evergreen programs base fees on NAV. The portfolio performance during the period impacts the NAV of these products and this translates to a corresponding change in firm-level AuM. As always, calculations for H1 AuM numbers are based on 31 May NAV valuations. Full-year AuM numbers are based on 30 November NAV valuations. End of June 2022 NAV valuations which are accounted for in H2 AuM numbers are expected to lead to a marginally negative adjustment to AuM. ⁴ Gating provisions are a standard feature for those evergreens which allow for redemptions; net redemptions are typically limited up to 25% p.a. of the prevailing NAV (stricter gating rules can be enforced for select share classes). Past performance is not indicative of future results. Source: Partners Group (2022).
