Temporary slowdown in activity in today's economic and rate environment is not unusual

US IPO and private equity transaction (PE) activity^{1,2}

- Bid-ask spreads widen in fast changing economic environment
- As a result, transaction activity temporarily recalibrates downwards
- Magnitude of reaction tends to be more moderate in private markets
- Public market transaction activity via IPOs remains more volatile

¹ Partners Group model net return data year-to-date ('YTD') 2022 as of 30 September 2022. All cash flows and valuations are converted to USD using fixed FX rates as of the date of the track record. Return figures denote pooled internal rates of returns (IRR). Reference index returns denote time-weighted returns. Model net returns assume Partners Group proposed management fees. Performance fees were included for Private Equity, Private Real Estate, Private Infrastructure, and Direct Lending. Model net figures do not include the impact of other possible factors such as any taxes incurred by investors, organizational expenses typically incurred at the start of the investment program, search fee, admin fee, ongoing operating costs or expenses incurred by the investment program (e.g. audit, hedging) or cash drag. The performance presented reflects model performance an investor may have obtained had it invested in the manner shown and does not represent performance that any investor actually attained. **Note:** Past performance is not indicative of future returns. Sustained AuM growth impacted by FX

Total assets under management development (in USD billion)

Due to rounding, some totals may not correspond with the sum of the separate figures. Figures are as of 31 December 2022. ¹ Tail-downs & redemptions: tail-downs consist of maturing investment programs (typically closed-ended structures); redemptions stem from evergreen programs. ² Other consists of performance and investment program changes from select programs. ³ Gating provisions are a standard feature for those evergreens which allow for redemptions; net redemptions are typically limited up to 25% p.a. of the prevailing NAV (stricter gating rules can be enforced for select share classes). ⁴ Partners Group reports fee-paying AuM. Most of the firm's evergreen programs base fees on NAV. The portfolio performance during the period impacts the NAV of these products and this translates to a corresponding change in firm-level AuM. Full-year AuM numbers for evergreen programs are typically based on 30 November 2022 NAV valuations. Past performance is not indicative of future results. **Source:** Partners Group (2023).

20+ year track record of providing leading evergreen solutions across market cycles

Selection of evergreen funds by strategy, initiation, and size

- USD 41 bn in tailored evergreen solutions across¹; inflows exceeded redemptions in H1 and H2
- Over two decades of running open-ended structures across multiple market cycles and downturns
- Carefully designed asset allocation policies and liquidity terms help give a certain amount of liquidity to investors
- In a prolonged market downturn if redemption requests exceed relevant limits², gating would automatically be enacted
- Investors welcome gating to protect their investment and expect it to be used when Partners Group deems it advisable
- Diversified portfolio construction, geographical reach, and investor base increases the resilience of our evergreens

¹ Figures are as of 31 December 2022. Figures show AuM of the respective funds (rounded).

² Gating provisions are a standard feature for those evergreens which allow for redemptions; net redemptions are typically limited up to 25% p.a. of the prevailing NAV (stricter gating rules can be enforced for select share classes).
